

Anti-Dis3 (S. pombe) antibody, rabbit serum

63-123 100 μl

Storage: Shipped at 4° C or -20° C, and upon arrival, aliquot and store at -20° C.

Immunogen: Recombinant truncated Dis3 protein (70 kDa)

Form: Rabbit antiserum added with 0.05 % sodium azide.

Reactivity: Reacts with S. pombe Dis3 protein. Not tested for other species.

Applications:

1. Western blotting (100~300 fold dilution) 2. Immunofluorescence staining

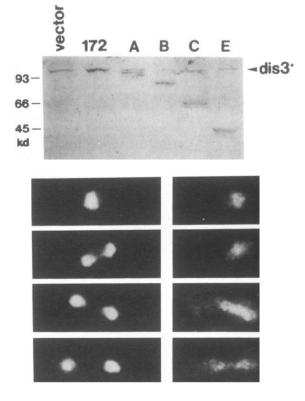

Background: *S. pombe* **Dis3** protein is an essential component for mitotic segregation (ref.1). It is a component of the exosome 3'->5' exoribonuclease complex. It is required for the 3'-processing of the 7S pre-RNA to the mature nuclear complex. It is also associated with the GTPase Ran and has a 3'-5' exonuclease activity. It is composed of 970 amino acids with molecular mass of 110 kDa. It is highly conserved functionally and structurally from yeast to human.
