

Anti-Ssb2 / Rpa2 (*S. pombe*) antibody, rabbit polyclonal

63-037 100 µg

Shipping and Storage: Shipped at 4°C or -20°C and store at -20°C.

Immunogen: Recombinant His6 *S. pombe* Ssb2 protein (full size, 1-279 amino acids).

Form: 2.0 mg/ml in PBS- with 50% glycerol, Sterilized by ultrafiltration. IgG fraction purified with Protein A.

Reactivity: *S. pombe* Ssb2 protein

Applications

1. Western blot (1/1000-1/2000)
2. Chromatin Immuno-Precipitation (1/500)

Background: Ssb2 (synonym:Rpa2) binds to single-strand DNA and play a role in DNA replication, recombination and repair. Length, 279 amino acids. Molecular mass, 30.4 kDa. The protein undergoes phosphorylation at two Ser and two Thr.

Subcellular location: Nucleus

Data Link: UniProtKB [Q92373](https://www.uniprot.org/entry/Q92373) (RFA2_SCHPO)

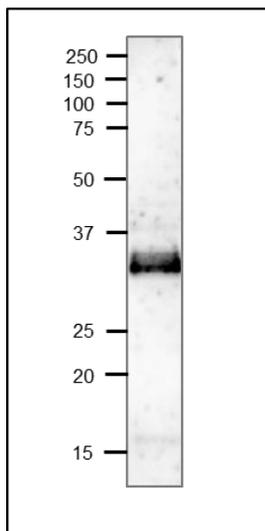

Fig.1 Western Blot of Ssb2 protein

Crude extract of *S.pombe* strain MP111 (8 µg) was separated on 12.5% SDS-PAGE and blotted to PVDF membrane. Membrane was blocked with 5% skim milk. Anti-Ssb2 antibody was used at 1/1,000 dilution and the second antibody, Goat anti-rabbit IgG, HRP-conjugated was used at 1/10,000 dilution. Anti-Sld5 antibody was used at 1/500 dilution. Second antibody (goat anti-rabbit IgG antibody HRP-conjugated (ab97051) was used at 1/10,000 dilution. *S. pombe* extract,

The antibody detects a 30kDa band, corresponding to the size predicted from the protein sequence.
